

## Vonage Box™ Quick Start Guide

CONGRATULATIONS! WELCOME TO VONAGE

# How to Get Started

If you purchased your Vonage Box™ at retail, please activate your account by visiting [vonage.co.uk/activate](http://vonage.co.uk/activate). Upon completing your Vonage Box™ activation, wait 10–15 minutes before connecting your box.

### FIRST

## Check Your Items

#### YOU'LL NEED THESE TO BEGIN:

- Broadband Internet connection
- Home telephone
- Wi-Fi router

#### Vonage Box™ package includes:

Vonage Box™

Blue Ethernet Cable

Telephone Socket Adapter

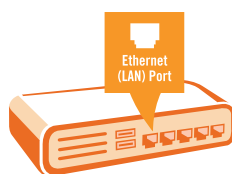

Vonage Box™ Power Supply Unit

### SECOND

## Locate an Open Ethernet Port

#### VERIFY YOUR SETUP:

- Make sure your Wi-Fi router has an open Ethernet (LAN) port — the blue Ethernet cable will go in there.
- If your existing Wi-Fi router doesn't have an open Ethernet (LAN) port available, you'll need to get an Ethernet switch.
- For additional information, troubleshooting, visit [vonage.co.uk/support](http://vonage.co.uk/support).

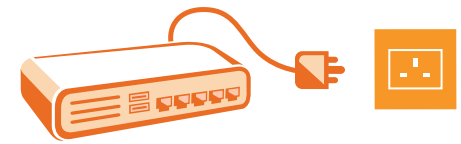

### THIRD

## Steps to Connect Your Vonage Box™

### NOW IT'S TIME TO CONNECT THE VONAGE BOX™

#### STEP 1

Unplug your Wi-Fi router's power supply before you begin installation.

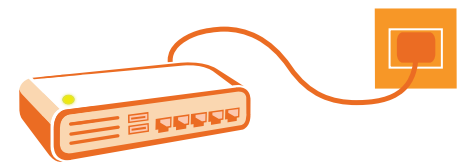

#### STEP 2

Connect the blue Ethernet cable to the blue Internet port on the back of the Vonage Box™ and connect the other end to an open Ethernet (LAN) port on the back of your Wi-Fi router.

#### STEP 3

Plug in your Wi-Fi router to the power source. Wait for the internet light on the Wi-Fi router to turn on, indicating an active Internet signal.

#### STEP 4

Connect the power supply cord to the back of the Vonage Box™ and plug the other end into the power source. Use of a surge protection device is recommended.

#### STEP 5

Confirm the power LED light on top of the Vonage Box™ is green. Wait for the Internet LED light on top of the Vonage Box™ to then turn green.

- A POWER**  
A solid green LED light indicates the unit is powered on.
- B INTERNET**  
A solid green LED light indicates the unit is connected to the Internet.
- C LINK/ACT**  
A blinking green LED light indicates activity on the Internet port.
- D PHONE**  
A solid green LED light indicates your phone is ready to use; a blinking LED light indicates you have new voicemails.

#### CAUTION:

**Do not disconnect power** from the Vonage Box™ when the Internet LED and the phone LED on top of the Vonage Box™ **are both blinking green in unison. This indicated an update is in progress. The update process can take up to five minutes.**

#### STEP 6

Connect the supplied telephone socket adapter into the green phone port\*. Connect your telephone cord into the telephone socket adapter. Confirm you have a solid green phone LED light displayed on the Vonage Box™. Pick up your telephone handset and start calling.

\*Does not support a fax line.

## Congratulations!

You've completed your Vonage Box™ activation. You can now pick up your handset and call to your heart's content.
